Hello,

This notification confirms that the release volume from Glen Canyon Dam for March 2024 will be 675,000 acre-feet. Hourly and daily average releases from Glen Canyon Dam for March 2024 will be scheduled through Western Area Power Administration to be consistent with the Glen Canyon Dam, Record of Decision (dated December 2016) and to also achieve, as nearly as is practicable, this monthly volume.

Hourly releases during March 2024 will fluctuate from a low of approximately 8,000 cfs during the early morning hours to a high of approximately 14,075 cfs during the afternoon and evening hours. The weekend minimum is anticipated to be approximately 7,886 cfs during the early morning with a peak of approximately 12,697 cfs during the evening hours. The anticipated monthly release volume for April is anticipated to be 601,000 acre-feet and will be confirmed with a subsequent notification toward the end of March.

This notification supersedes all previously issued ones and is current until a new one is issued. All times identified in this notification are local time (Mountain Standard Time) and not hour ending.

Kind regards,
Heather
