

**Subject:** Glen Canyon Notification  
**Date:** Monday, April 29, 2024 at 8:33:24 AM Mountain Standard Time  
**From:** Patno, Heather E  
**To:** Patno, Heather E

Hello:

This notification confirms that the release volume from Glen Canyon Dam for May 2024 will be 599,000 acre-feet. Hourly and daily average releases from Glen Canyon Dam for May 2024 will be scheduled through Western Area Power Administration to be consistent with the Glen Canyon Dam, Record of Decision (dated December 2016) and to also achieve, as nearly as is practicable, this monthly volume.

Hourly releases during May 2024 will fluctuate from a low of approximately 6,841 cfs during the early morning hours to a high of approximately 12,232 cfs during the afternoon and evening hours. The weekend minimum is anticipated to be approximately 5,649 cfs during the early morning with a peak of approximately 11,040 cfs during the evening hours. The anticipated monthly release volume for June is anticipated to be 628,000 acre-feet and will be confirmed with a subsequent notification toward the end of May.

This notification supersedes all previously issued ones and is current until a new one is issued. All times identified in this notification are local time (Mountain Standard Time) and not hour ending.

Kind regards,  
Heather
